KRONE BY LG INDUSTRIES

We create innovative durable designs to make your bathroom unique – backed by over 20 years of expertise.

Located in the Hauts-de-France region, our company was founded by Mr Thierry Lelong. For over 20 years, we have been designing high-end shower panels and enclosures, taps, and bathtubs. We create, manufacture, and distribute exceptional products, driven by our core values: Quality, Design, and Durability.

At LG INDUSTRIES, "Details matter" – each little thing can make the difference

**We guarantee your peace of mind: product quality,
compliance with standards, and durability.**

**With our long-
standing
expertise, we
design and
create your
bathroom with
absolute
respect for the
rules of the
trade.**

A TRUSTED PARTNER FOR YOUR PEACE OF MIND

Controlled production & strict quality checks

Thanks to regular investments, our factory is equipped with cutting-edge production tools that enhance productivity, flexibility, and competitiveness, while ensuring high-quality products.

In 2024, we doubled our factory's production capacity by investing in optimised robotics, on a 36,000m² site, to better meet customer demands.

Our quality control policy exceeds regulatory requirements and follows a very precise set of specifications: components are inspected before production, checks are carried out throughout the process, and final inspections are conducted in line with AQL standards.

A RENOWNED PARTNER

FOR ITS QUALITY & INNOVATION

Our products are at the forefront of design and innovation, crafted from high-quality raw materials to ensure durability. Each product reflects the expertise and craftsmanship of our teams.

***Recognised Expertise, Built Over Time**

For 20 years, we have built strong, lasting relationships with our customers. They trust us and benefit from our services:

- High-quality, durable products
- Product repairability
- Availability of parts for over 10 years.

The trade press also recognises our commitment and unique qualities.

***Details matter, quality and precision**

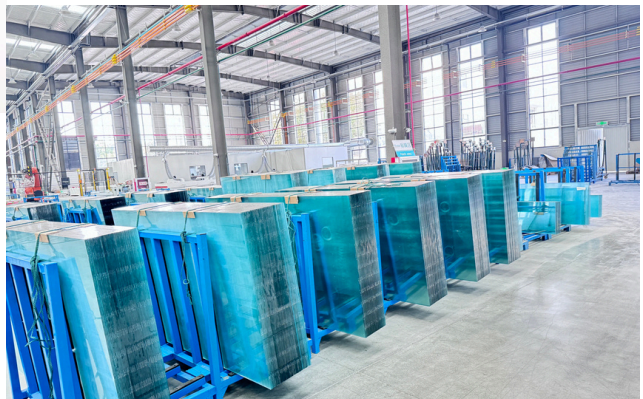

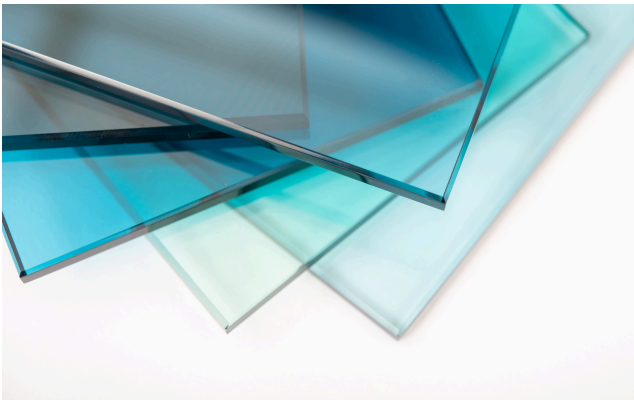

"Details matter" highlights our commitment to applying our standards in every aspect of our work

We remain attentive to our customers' expectations and market trends, while fostering our creativity to enhance our knowledge and skills. This approach is crucial to offering an innovative product portfolio that meets the needs of tomorrow.

QUALITY QUALITY QUALITY

To ensure the quality and durability of our products, we monitor every stage of our value chain, from the sourcing of raw materials to after-sales service.

The selection of raw materials is crucial: each base material undergoes strict controls to ensure consistent quality and compliance with current standards.

**WE CREATE EVERYDAY LIFE
SO THAT IT LASTS FOR YEARS**

MODULAR INNOVATIONS

INNOVATIONS...

PRODUCTS

Multiple solutions for specific requirements:

- Various configurations available: from SKY to CONCEPT SKY
- Ergonomic solutions: KONNECT walk-in delivered in a suitcase
- Disruptive designs: 2m25 shower panels to enhance a master suite

TECHNICAL

- 180° hinge: optimal opening without constraints or wear
- DECLIK towel rail: combining practicality with design
- Etched glass: timeless patterns on smooth surfaces

SKY SERIES

- Modular series: Walk-in, Walk-in with return, Concept Sky, and Cab'in Sky
- Adjustable and discreet "L" shaped fixing arm
- Maximised access with frameless sliding door

KONNECT SERIES

- Ease of transport
- Quick and simple installation
- Optimised storage space
- Customisable central design

INTEGRATION OF MANUFACTURING PROCESSES

We control the entire production process, from the manufacturing of profiles to the transformation of glass

- We carry out the finishing and tempering of glass in-house: we control all processes and inspections, and every piece of glass in our panels and enclosures is inspected.
- Our quality engineers are experts in ISO 9001 and sign off on every production
- Our product are 100% repairable. Spare parts are in stock, even for items over 10 years old.
- Thanks to this industrial and human commitment, we have maintained trusted relationship with our customers since the founding of our company.

A SOLUTION FOR EVERY NEED

WE ARE MANUFACTURERS OF SHOWERS

Our shower enclosures meet international certifications.

A high-quality and sustainable production

- Tempered glass: 100% of the glass is inspected
- Nano Care anti-fingerprint treatment, made in Germany, free from PFOA (no harmful substances)
- Premium-quality alloys
- Finishes: polished aluminium, matte black, gold, matte silver, rose gold...
- We carry out anodisation* and PVD treatment
- 100% repairable products
- Spare parts in stock

***ANODISATION VS PAINTING:**
Durable color – High resistance to impact and scratches – Significantly increases the durability of profiles

Astra - Walk-in

Fixed panel

Technical information

- + Height: 200cm
- + Reversible product
- + Easy installation with no visible screws
- + 2-year warranty
- + Wall compensation profile 20mm

Characteristics

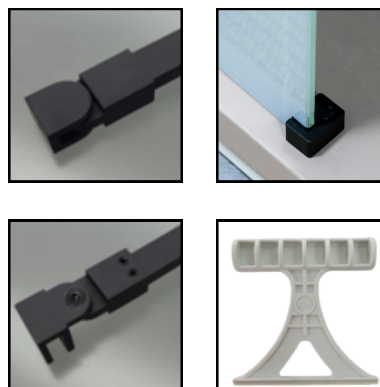

- + 6mm transparent tempered SECURIT glass
- + NANO-CARE anti-trace and anti-limescale treatment (on one side), made in Germany, PFOA-free (free from any harmful substances)
- + Multi-position and adjustable 120cm support bar
- + Can be installed on a shower tray or walk-in style
- + Option to add a pivoting door (see page 17) or a mobile panel (see page 18) to reduce splashes
- + Available finishes: polished aluminium or anodised* matte black

*ANODISATION VS LACQUERING:

Durable colour, high impact and scratch resistance, significantly increase the longevity of profiles.

Details

Included in the pack:

- + Aluminium profiles
- + Support bar
- + Metal floor fixing clip
- + End cap
- + Push handle for seal

Declik

Hook

DECLIK is the clever accessory that combines discretion and functionality.

- + It simply attaches above the shower screen without drilling or tools.
 - + It can also be subtly incorporated into the support arm, seamlessly blending into your shower design.
 - + Thanks to its ingenious mechanism, DECLIK opens with a single gesture to hold your towel and closes when not in use, almost disappearing into the surroundings. A smart and stylish solution.
 - + Made from durable materials, DECLIK offers exceptional robustness.
-
- + It is available in anodised* matte black, anodised* matte silver, and polished aluminium.

KRONE

WE ARE MANUFACTURERS OF **SHOWER TRAYS**

Solid Stone Haute-Couture

We prioritise high-quality materials, such as Solid Stone Haute-Couture, crafted to the highest standards of bespoke quality. Each tray is handcrafted by our artisans in our European workshop. Colours are applied by hand using traditional surface techniques, ensuring every piece has its own unique, refined finish.

Kairos, ultra-light KR-TECH

We work with a new formulation of the traditional composite mass, combining several **ultra-light**, technologically advanced fillers with next-generation resins. Thanks to this innovation and our state-of-the-art equipment, we are able to produce trays that are lightweight, robust, durable, and offer a precise, elegant finish. Our shower trays start from 22.5 kg/m², ensuring exceptional lightness without compromising on strength or durability.

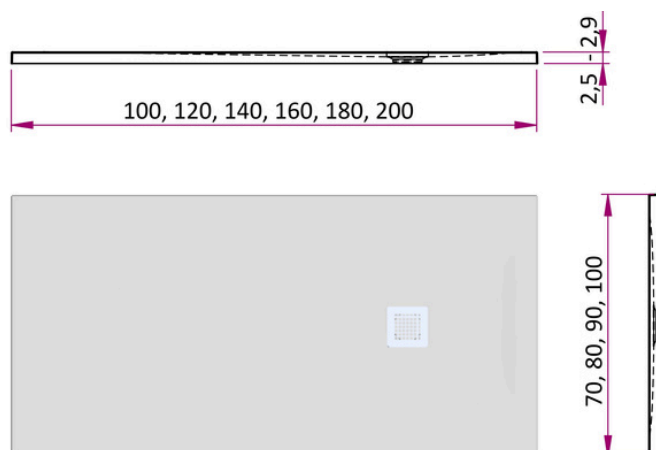

Kaïros

Shower tray

Technical information

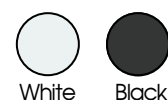

- + Length: from 80 to 200cm
- + Width: from 70 to 100cm
- + Thickness: between 25 and 29cm
- + Drain: 90mm diameter
- + 2-year warranty

DISTANCE TO CENTRE OF EVACUATION	
LENGTH	DISTANCE
80 to 120cm	30cm
121 to 160cm	40cm
more than 161cm	50cm

Characteristics

- + Made from the latest generation composite KR-TECH* with a top-of-the-range mineral filler (20-24kg/m² depending on format)
- + Antibacterial ISO NPG sanitary GelCoat surface
- + Stone texture
- + Customisable and adjustable in width and length, it can also be used to make cut-outs
- + Available in 2 colours

*KR-TECH is a new traditional bulk formulation, combining several ultra-light, technologically advanced fillers with latest-generation composite.

WE MANUFACTURE **TAPS**

Quality and Design...

As tapware manufacturers, we prioritise high-quality materials, such as solid brass and stainless steel. The components of our hydraulic system are carefully selected from the best on the market. Our products are certified.

We offer a range of finishes: chrome, matte black, and PVD, including brushed stainless steel and shades ranging from gold to gunmetal.

... To meet the needs of our customers.

We remain attentive to market trends and customers expectations. Our water-efficient, low-flow tapware fully meets environmental standards.

French production line

For several years, our ambition has been to create more jobs and added value in France.

By manufacturing our thermostatic mixers in the North of France, we reaffirm this commitment.

Our faucets meet the highest quality standards and are certified NF by the CSTB (Scientific and Technical Center of Building).

This local production provides us with optimal flexibility, allowing us to quickly and efficiently respond to specific demands while ensuring consistent quality.

In France we manufacture

THERMOSTATIC MIXERS

Characteristics

- + Hot/cold water
- + **Brass body, handle, trim under handle and base plate**
- + SEDAL C3 ceramic cartridge (cold water start in the central position: Ø 25 mm)
- + NEOPERL flow reduction aerator
- + Connection hoses and waste provided
- + Supplied with a matching brass pop-up waste and a kit for open waste
- + Available in 5 finishes:
 - Chrome
 - Matte black (anodised*)
 - Rose gold/Gun metal/Brushed Gold (PVD**)

Technical information

- + Total height: 173.5mm
- + Spout height: 82mm
- + Body: Ø 35mm

- + NEOPERL specialises in innovative solutions for drinking water and makes a valuable contribution to the sustainable use of drinking water worldwide.
- + C3 cartridges allow for water and energy savings by reducing water consumption and the energy required for hot water.
- + Anodising* offers a durable colour and high resistance to knocks and scratches.
- + PVD** coatings (Physical Vapor Deposition) are both shinier and more durable than traditional chrome coatings, providing better wear and scratch resistance and a longer lifespan.

krone

BY LG INDUSTRIES

The best value for money

KRONE offers shower columns equipped with thermostatic or mechanical mixers. Our commitment to quality, along with our rigorous selection and control of raw materials, ensures your peace of mind. With almost zero complaints, our track record speaks to our high standards.

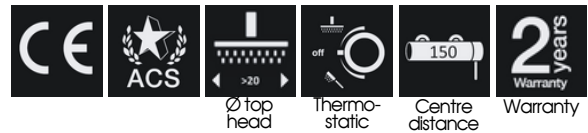

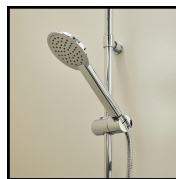

Our complete range, featuring harmonious designs and finishes, brings unity to your bathroom. We offer various finishes: chrome, matte white, matte black, or PVD, including brushed stainless steel and shades ranging from rose gold to gunmetal. Compliance with ACS and NF standards guarantees the quality of your shower column.

KRONE

WE ARE MANUFACTURERS OF BATHTUBS

The design...

With 20 years of experience in manufacturing double-shell bathtubs, we are strengthening our position in the design market.

Discover our collection: the ANTIK bathtub with its timeless charm for a retro effect; the MONACO bathtub, offering a sophisticated look with elegant reliefs; and the COLORS transparent bathtub, for an original design.

...and the quality

KRONE collaborates with the acrylic sheet manufacturer, LUCITE. Each bathtub is handcrafted by our master craftsmen in our workshop. Thanks to adjustable central feet, we ensure optimal level?

Finally, each bathtub undergoes a thorough 100% inspection before shipment, with an additional polishing step carried out by our team.

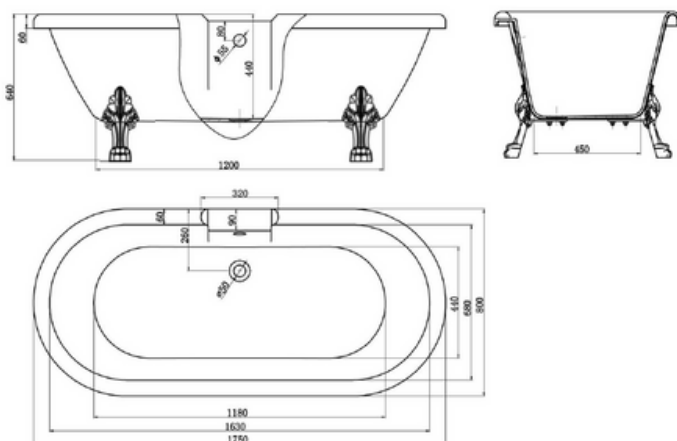

Antik

Freestanding bathtub

Technical information

- + Adjustable metal feet
- + Dimensions: L 1750 x W 800 x H 640mm
- + Depth: 440mm
- + Capacity: 170litres
- + Weight: approximately: 42Kg
- + Base thickness: between 12 et 16mm
- + Handmade bathtub, one piece
- + 2-year warranty

- + Weight: 55kg
- + 2-year warranty

Characteristics

- + This "double shell" bathtub is made of two specifically formed LUCITE acrylic sheets, reinforced between them by a biscuit. This technology allows great flexibility in design, while ensuring strength, safety, and durability
- + Its oval shape with a gently sloped inner shell invites relaxation
- + Drainage system with "invisible" overflow
- + Available finishes: matte white and glossy white

- + LUCITE brand sheets are of superior quality; the acrylic maintains a perfect white over time and offers excellent resistance to wear and external elements

Details

Included in the pack:

- + Click-clack waste with a cap in glossy white or matte white, depending on the finish

FINISH	REF

BESPOKE LOGISTICS SERVICES

Available stock

Our 12,000 m2 logistics centre stands out with its modern and secure storage facilities, meeting the highest standards. With optimised management, we accommodate a wide variety of products, regardless of their size or specific requirements. Our intelligent systems ensure real-time traceability and accessibility, guaranteeing efficient and secure warehousing.

Functional and secure packaging

We use cutting-edge technologies to ensure the safety and integrity of goods during transport, and our specialised teams are trained to design bespoke packaging solutions tailored to each product and its specific requirements. Our rigorous processes and global logistics network guarantee efficient delivery.

CSR Commitments and results

Committed!

● Our factory is certified BSCI, ISO 9001 and ISO 14001

+ The BSCI label recognises companies committed to improving working conditions in their global supply chains.

We achieved an A rating in 10 out of 13 assessed areas, placing us among the top-performing factories.

+ The ISO 9001 certification ensures compliance with strict quality and management standards, guaranteeing reliable and high-performance products and services.

+ The ISO 14001 certification demonstrates our commitment to reducing environmental impact and adopting sustainable practices.

● EcoVadis - PLATINIUM

+ LG INDUSTRIES has achieved the highest level of recognition in the EcoVadis audit: the PLATINIUM medal places us among the top 1% of audited companies, for the fourth consecutive year.

CSR at the heart of our historical processes:

Product

- Materials guaranteed to be free of hazardous substances
- Profiles free of heavy metals
- NanoCare treatment without PFOA (free from any harmful substances)
- Tempered glass: 100% verified

Factory

- New 36,000m² factory opened in 2024, double the size of the previous one
- Integration of new, more efficient machines that optimise productivity and reduce energy consumption
- Located in a specialised sub-component production area allowing faster supply and reduced logistical costs

Human

- Fair and equitable working conditions for our employees
- Diversity and equal opportunities
- Commitment to gender parity
- 100% of employees are on permanent contracts

Packaging

- FSC-certified packaging
- Elimination of plastics
- Optimisation of containers
- Mineral-based inks
